

Special Issue

Polymer Materials in Electron Transfer-Based Devices

Message from the Guest Editors

Electron transfer is a fundamental concept in chemistry, physics and material science that underlies various chemical processes, biological processes, and technological applications. Numerous state-of-the-art functional devices and materials are associated with the process of electron transfer. Furthermore, an increasing number of polymer materials are playing crucial roles in this process. This Special Issue focuses on functional devices based on electron transfer processes involving polymer materials, including but not limited to capacitors, batteries, photovoltaic devices, sensors, electrochromic devices and so on.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
