

Special Issue

Advances in Polyelectrolytes and Polyelectrolyte Complexes, 2nd Edition

Message from the Guest Editors

Natural and synthetic polyelectrolytes have gained great interest in recent years for different applications. Polyelectrolyte complexes (PECs) are micro-/nanostructured units with exceptional properties obtained via the polymeric interaction between cationic and anionic polyelectrolytes. This Special Issue aims to collect research papers and review articles with contributions to developing novel materials prepared using polyelectrolytes or polyelectrolyte complexes. Information about the relationship between the chemical structure of the polyelectrolytes and the characteristics of the PECs obtained from the morphology, thermal, optical, and/or mechanical properties of the materials based on PECs is relevant. The Special Issue covers, among other topics, polyelectrolyte and polyelectrolyte complexes in:

- Multilayers;
- Drug delivery;
- Wound healing and tissue engineering;
- Packaging films;
- Paper additives and coatings;
- Membranes and gels;
- Bioadhesives.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
