

## Special Issue

# High-Performance Conducting Polymer Materials

### Message from the Guest Editor

This Special Issue covers the new molecular design, preparation, characterization, properties, and applications of CPs. The applications of CPs are not limited to OPVs, OTFTs, and OLEDs; they can be extended to organic thermoelectric devices and even bioelectronic applications using electrochemical transistors, which are able to stimulate the electrical activity of the nervous system. The aim of this Special Issue is to update recent knowledge, find new fundamental insights, and demonstrate applications with commercial viability for conducting polymers.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
