Polymer Innovations for Advanced Biomedical Applications: Insights and Developments

Message from the Guest Editor

Polymer-based materials are widely used in biomedical fields. This Special Issue deals with innovations that may lead to new polymer-based products for biomedical applications. Papers regarding innovations in polymer synthesis, modifications, blending, and the fabrication of polymer-based composites are highly expected. Innovative polymer-based materials for wound dressing, scaffolds, drug delivery systems, implants, face masks, etc., are of interest in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
