New Progress of Green Sustainable Polymer Materials

Message from the Guest Editor

Polymer materials have been supporting a wide range of cutting-edge technologies, driving our cultural and industrial development. On the other hand, these materials have also negatively impacted global environments, including fossil fuel depletion for plastics production, increased CO₂ emissions during their incineration, pollution from plastic waste, and ecosystem disruption from their decomposition by-products. Designing polymer materials to address these problems while considering the end-of-life stage of plastics is critical in achieving sustainable development.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
