

Special Issue

Advanced Polymer-Based Composites

Message from the Guest Editors

Polymeric composites are finding a wide range of applications due to their adaptability. They can be combined with a number of fillers/reinforcements, e.g., nanoparticles, nanofibers, nanowires, etc., to offer applications as sensors, actuators, energy harvesters, and so on. The development of advanced polymeric composites is crucial for the next-generation technologies. This Special Issue focuses on the development of novel composites using facile/innovative fabrication methods and their applications as ultra-stretchable, flexible, wearable, tactile/haptic, self-healing composites, and others. Articles, communications, and reviews by the experts in this field are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
