

Special Issue

Biopolymers for Tissue Engineering II

Message from the Guest Editors

Tissue engineering, as one of the most challenging research areas, can afford alternative materials for growth and regeneration of damaged organs and tissues. The efficiency and success of tissue engineering highly dependent on the materials applied for the development of matrixes. Biocompatibility, mechanical properties, and functionality of materials are the key factors for determining the performance of the final matrix. Biopolymers (including polysaccharides, polypeptides, polyphenols, etc.) have got particular attention on research as accessible biomaterials for tissue engineering applications.

Accordingly, this special issue will focus on recent progresses and developments related to the utilizing of biopolymers as promising biomaterials for tissue engineering and regeneration. We invite you to submit your research articles, review papers and short communication which can generate new insights into this area of science.

Guest Editors

Dr. Payam Zarrintaj

Dr. Masoud Mozafari

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
