

Special Issue

Biopolymers for Medicinal, Macromolecules, and Food Applications

Message from the Guest Editor

Biopolymers display versatile properties with applications in medicine, pharmaceutical, food packaging, electronics, tissue engineering, agriculture, and forestry. Promising physicochemical and bioactive properties have established their use as wound dressing materials, and in cosmetics too. Proteins are one of the most studied biopolymers, which play an important task in recognition, bioenergetics, and interactions in biologically relevant model systems. This issue provides an opportunity to discuss trends in the field of biopolymers for medical, macromolecules, and food applications.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
