Biopolymers in Vaccination, Immunotherapy and Nanotechnology

Message from the Guest Editors

Biopolymers are key molecules in all living organisms. These molecules can perform several functions and their absence in living cells can lead to several diseases. Efforts are being made to deliver missing or deficient molecules into living cells. Furthermore, biopolymers can be used to design vaccines to fight infectious pathogens. Recently, mRNA vaccines have been used successfully to provide immunity against the pathogen causing COVID-19. It is expected that more mRNA-based vaccines will be developed using this promising technology.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
