

Special Issue

Advances in Polymer Processing Technologies: Injection Molding

Message from the Guest Editor

Dear colleagues,
With the advances in injection molding technology, several technologies, including conformal cooling channels, molding prediction and optimization, smart molding, rapid heating and cooling, polymer foaming, core back, gas counter pressure, and injection-compression molding, have been introduced to overcome the molding problem. In this Special Issue of *Polymers*, we will provide some leading knowledge about these techniques. Thus, we seek to spotlight findings that incorporate a wide range of topics. Research articles or reviews concerning the topic are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
