Special Issue

Crystallization in Polymer Science

Message from the Guest Editor

Crystallization of polymers continues to be a primary area of fundamental research. Many questions about the formation and growth of polymer crystals persist nearly 100 years after their discovery. While finding answers is technologically important for applications in commodity and advanced use plastics, knowledge and expertise in this area is waning. This Special Issue aims to publish works from early- and mid-career researchers interested in solving fundamental questions, developing structure–property relationships, and evaluating crystalline behavior in advanced materials for energy or bio-based polymer systems.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
