

Special Issue

Polymers for Drug Delivery and Wound Healing

Message from the Guest Editors

Tremendous progress has been made in the development of polymeric materials for biomedical and pharmaceutical applications in recent years. These materials include natural, synthetic and semi-synthetic polymers. These developments have greatly enhanced our understanding of the properties of these materials, which in turn has enabled us to exploit and modify them to suit the prevention and treatment of specific medical conditions. Many of these materials incorporate desirable properties for drug delivery and wound healing, such as versatility, bioreactivity, tunability, biocompatibility, manufacturability and sustainability. This special issue aims to celebrate these advances and encourage knowledge sharing to spur further progress in this area. In this special issue, we invite original research articles and comprehensive reviews on the applications of polymers in drug delivery and wound healing.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
