

Special Issue

Application of Polymer Composites in Biomaterials

Message from the Guest Editor

Polymer composites are a special class of polymers that include natural, synthetic, and biocomposites. In this Special Issue, we would like to highlight the application of polymer composites in the food industry and environment remediation. Regarding the food industry, we welcome the submission of reports on antimicrobial and biodegradable polymer composites for active food packaging applications. In the area of environment remediation, novel, biodegradable and recyclable materials that could be used in soil and water remediation are encouraged to be published in this Issue. In addition, we would like to receive papers on both synthetic and natural polymers, as well as composites of inorganic and organic materials.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
