

Special Issue

Advance in New Energy Materials and Devices

Message from the Guest Editors

With the increasing depletion of energy and growth in climate change, developing renewable energy has become the central theme of world energy development. New energy materials and devices are the key to implementing the transformation and utilization of renewable energy technologies. This Special Issue focuses on the research and development of a new generation of high-performance green energy materials, technologies and devices. Energy conversion and storage materials, device design and preparing technology are the main research directions. Topics concerning solar cells, batteries and photocatalytic systems will receive increasing interest due to their clean, green sources and important application potential.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
