Environmentally Friendly Polymer Materials

Message from the Guest Editors

Environmentally Friendly Polymer Materials are ideal and sustainable substitutes for products derived from petroleum. The development of these materials has been increasingly significant. Several new technologies focus on processes for the production of polymer materials from different types of residual biomass or wastes. However, research on these themes is advancing extremely fast; therefore, a compilation of the latest advances in the field would be profitable to connect interested authors and readers. This Special Issue aims to cover current and emerging strategies for developing natural-based or valorized waste materials and the use of sustainable production technologies, focusing on the aspects that conduct present and future research in this area. This issue will be a good opportunity for authors to publish their original research after peer review by expert researchers of eco-friendly polymer materials. Review articles by experts in this scientific research area are also strongly encouraged to be submitted for publication in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
