# Special Issue

# Innovative Ionic Conductive Polymers

### Message from the Guest Editors

Research in the field of ionic conductive polymers continues to advance, leading to the development of novel materials with enhanced properties and a broader range of applications. Ionic conductive polymers, often referred to as ion-conductive polymers, are a class of materials that exhibit the ability to transport ions and are typically categorized based on the types of ions they can conduct and the functional groups incorporated into their structure, like anion/cation-conductive polymers, proton-conductive polymers, polymeric ionic liquids (PILs), polyethylene oxide (PEO)-based polymers, polyelectrolytes, etc. These materials play a crucial role in the ongoing development of more efficient and sustainable technologies in various industries, including energy storage, flexible electronics, smart materials, bioelectronics, electrochemical sensors, fuel cells, and water purification, among others. For this Special Issue, we invite researchers to share their innovative results in the area of ionic conductive polymers for the development of next-generation materials.

### Guest Editors

Dr. Antonela Gallastegui

POLYMAT, University of the Basque Country UPV/EHU, Avenida Tolosa 72, 20018 Donostia-San Sebastian, Spain

Dr. Daniele Mantione

POLYKEY Polymers, Joxe Mari Korta Center, 20018 Donostia-San Sebastian, Spain

# About the Journal

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Editor-in-Chief

Prof. Dr. Alexander Böker
Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

## Author Benefits

**Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:**

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry )
