

Special Issue

Polymeric Materials for Drug Delivery Applications—2nd Edition

Message from the Guest Editor

This Special Issue, “Polymeric Materials for Drug Delivery Applications—2nd Edition”, aims to explore the diverse range of polymeric materials utilized in drug delivery systems, addressing their synthesis, characterization, and application in pharmaceutical sciences. Moreover, it aims to present research on innovative polymeric platforms for controlled drug release, targeted delivery, and enhanced therapeutic efficacy. Contributions may include novel polymer synthesis methods, advanced characterization techniques, and comprehensive evaluations of drug delivery systems' performance and biocompatibility. Additionally, this Special Issue welcomes studies on the optimization of polymeric carriers for specific drug classes or disease treatments, as well as investigations into the mechanisms governing drug release kinetics and cellular interactions. Overall, this Special Issue seeks to highlight the latest breakthroughs in using polymeric materials to improve healthcare and the efficacy of treatments.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
