

Special Issue

Failure Mechanism of Eco-Polymeric composites

Message from the Guest Editors

In the recent years, there is high demand to implement eco-polymeric composites in various industries. However, there are many limitations preventing the industries in adopting such materials and one of them is the lack of understanding to the failure mechanism of these new materials. Failure mechanism is one of the key factors in materials selection for machine/components' design and applications. This special issue would cover the failure mechanism of different newly developed eco-polymeric composites under different loading conditions, i.e. mechanical, physical, environmental ...etc., which would assist academic, environment, and industrial sectors.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
