Advance and Progress of Fiber-Reinforced Polymers in Reinforcing and Strengthening Concrete Structures II

Message from the Guest Editor

Fiber-reinforced polymers (FRPs) are increasingly being used in the global construction industry. Corrosion resistance and high strength to weight ratio are two of the main features that encourage the use of FRP materials in concrete structures. FRPs in the form of rods are used in reinforcing structural members in concrete buildings, bridges, parking garages, etc. FRP sheets/plates are also used for the external strengthening of various members of different concrete structures. With the progression of research over the last two decades, more understanding and confidence have been acquired regarding the behavior of FRP materials as internal or external reinforcements. This Special Issue aims to compile the most recent advances in these areas, and as such, original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
