State-of-the-Art Polymer Science and Technology in France (2022, 2023)

Message from the Guest Editors

We are literally surrounded by polymers in every aspect of our life, often without even realizing it. In France, a flurry of research is conducted by scientists and engineers active in both academia and industry in all sort of polymer materials, such as in electricity, electronics, information, biotechnology, medicine, dentistry, automotive and transportation, building, wood, energy, bio and biosourced materials, the environment, and in aviation and space applications. The further developments in this science continue on a daily basis and will contribute to even more innovative materials and technologies continuing to change the world for the better and to change the way we all live. We hope that this Special Issue will be representative of some of the cutting-edge, innovative research in polymer science and technology in France.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
