

Special Issue

Modelling and Simulation of Proteins, Biopolymers and Biocompatible Materials

Message from the Guest Editors

Today, molecular modelling techniques comprise valuable methods and tools assisting a wide area of knowledge and experiments, both guiding and explaining molecular processes. This Special Issue focuses on the modelling and simulation of biopolymers and biomaterials which represent a breakthrough in the field in terms of describing important biological processes or applications. Potential topics include (but are not limited to) the following:

- Protein folding and stability;
- Peptidomimetics design;
- Functional materials;
- Quantum calculations for biopolymers;
- Docking in DNA or in proteins/enzymes;
- Molecular Dynamics Simulations of proteins and biomaterials;
- MD simulations to estimate physicochemical and rheological properties;
- Deep Eutectic mixtures as solvents for chemical reactions;
- Modelling of Deep Eutectic mixtures.

We hope that this Special Issue can help to promote the use of molecular modelling methods in contemporary research by offering a fresh perspective on its use in biopolymers.

Guest Editors

Dr. Tarsila Gabriel Castro

Dr. Cristina E. A. Sousa

Dr. Carla Silva

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
