

Special Issue

Mechanical and Dynamic Characterization of Polymeric Composites

Message from the Guest Editors

The development of composite materials, which could be made of thermosetting or thermoplastic polymers after reinforcement, is diversified because they are used in many applications and exhibit strong performance. This Special Issue on “Mechanical and Dynamic Characterization of Polymeric Composites” is mainly in the fields of composite materials engineering and scientific studies. Innovative research-based on various mechanical properties of composite materials and dynamic analysis is invited. The research content of the studies includes purpose and innovation, material production and processing, reinforcement methods, and theory of composite materials combined with multiple materials.

We look forward to making breakthroughs in the field of composite materials and profound discussions and gains on the mechanical properties, processing methods, and application discussions of composite materials.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
