

Special Issue

Electrospun Nanofibers and Membranes for Air and Water Filtration

Message from the Guest Editor

The scope of this Special Issue is on polymers for applications in air and water filtration. This includes electrospun nanofibrous membranes, water filtration applications, water treatment applications, air filtration, emerging viruses detection, treatment, and development of drugs and masks inclusive of but not limited to COVID-19, development of COVID-19 masks, face masks, and surgical masks, sustainable polymers, and the circular economy. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
