Special Issue

3D-Printed Polymer and Composite Materials for Dental Applications

Message from the Guest Editors

3D printing technology has revolutionized the way that various industries manufacture and design products, and the field of dentistry is no exception. One of the major advantages of 3D-printed polymer materials in dentistry is the ability to create customized, patient-specific appliances or treatment accessories. Another advantage of 3D-printed polymer materials is their durability and strength. In addition to their strength and conformability, 3D-printed polymer materials are also highly biocompatible. In addition to various clinical implementations, 3D-printed polymer materials are also being used in material research and dental education. In conclusion, the use of 3D-printed polymer materials in dentistry has the potential to revolutionize the way that dental appliances and accessories are designed and manufactured, these materials offer many advantages over conventional materials and are likely to play an increasingly important role in the field of dentistry in the coming years.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker
Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
