

## Special Issue

# Application of Polymeric Materials in Tissue Engineering

### Message from the Guest Editors

Biocompatible and biodegradable polymers are promising materials for tissue engineering applications. Through 3D printing, electrospinning, freeze drying, gas foaming, etc., mimicking extracellular matrix (ECM) structures can be produced to stimulate tissue regeneration physically. Biocompatible polymers are also regarded as excellent substrate loading with functional nanomaterials and biologically important polypeptides (such as growth factors) for the construction of multi-functional scaffolds. Multifunctional scaffolds hold potential to enhance cell attachment, cell proliferation, cell migration, cell elongation, cell differentiation, or expression of specific genes as excellent artificial scaffolds for tissue engineering.

### Guest Editors

Dr. Yingchun Su  
Dr. Menglin Chen  
Dr. Zhongyang Zhang

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
