

Special Issue

A Commemorative Issue in Honor of Professor Sir Fraser Stoddart: Functional Coordination Polymers

Message from the Guest Editor

This Special Issue is in memory of Sir Fraser Stoddart to honor his contribution to supramolecular coordination polymers. The Special Issue focuses on the design, synthesis, structure and properties of functional coordination polymers and supramolecular coordination polymers, including, but not limited to, absorption, separation, sensors, chirality, catalysis, photoluminescence, nonlinear optical properties, magnetic properties, hydrogen storage, energy storage, drug delivery, self-healing materials, supramolecular polymers, hydrogen gels, water gels, bio-mimic materials, and computational studies on the relationship between structure and properties.

Guest Editor

Prof. Dr. Hui Li

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
