

## Special Issue

# Fibre-Reinforced Polymer Composites

### Message from the Guest Editors

Fibre-reinforced polymers (FRPs) are composite materials made of a polymer matrix reinforced with fibres. FRP are used in different multilayer sheets called FRP laminates. As FRP laminates are light, flexible, and have a high tensile strength, they have the potential to be a suitable alternative to steel due to advancements in materials and manufacturing technologies. These high-performance materials are used to increase strength, while reducing the weight of engineering structures. This Special Issue is intended to gather papers related to theoretical and experimental studies of fibre-reinforced polymer composites.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
