# **Special Issue**

# Polymer Electrolytes and Catalyst Binders

# Message from the Guest Editor

The proposed Special Issue is about polymer electrolyte membranes and catalyst binders used for fuel cells or water electrolysis applications. It includes their design, synthesis, and physical or chemical modification to improve their electrochemical performance and/or to extend their service life. Furthermore, the Special Issue deals with organic, inorganic, and hybrid additives to satisfy these requirements.

# **About the Journal**

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.
