

Special Issue

Polymer Nanocomposites for the Removal of Pollutants from Contaminated Water

Message from the Guest Editor

This Special Issue, “Polymer Nanocomposites for the Removal of Pollutants from Contaminated Water”, will summarize recent progress in the development of material properties, fabrication methods, and applications of polymer nanocomposites for treatment of contaminants and sensing and detection of pollutants. This issue will present current research into how polymer nanocomposites can be used for the removal of pollutants from contaminated water, detailing major environmental issues and the key material properties and existing polymers or nanomaterials that can solve these issues.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
