

Special Issue

Polymer-Based Energy Conversion Materials

Message from the Guest Editor

Polymer-based materials have played an important role in the emerging wearable and portable energy conversion devices for supplying renewable and clean power. This Special Issue entitled “Polymer-Based Energy Conversion Materials” aims to collect papers on the applications of polymer-based materials in the fields of thermoelectrics, triboelectric nanogenerators, piezoelectric nanogenerators, solar cells, moist-electric generation, self-powered sensors, and other related energy conversion materials and devices. Both research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
