

Special Issue

Polymer Surface Modification for Sensor Applications

Message from the Guest Editor

This Special Issue is aimed at the surface modification of electrodic surfaces using polymers for sensing applications. Chemically modified electrodes are different from other types of bare electrodic surfaces as they have a molecular layer film made from various chemical compounds. These films are coated on the surface of the electrode using different approaches. The outcome would be a modified electrode with unique new chemical properties in terms of physical, chemical, electrochemical, optical, electrical, transport, and other valuable properties. We are inviting authors to submit articles based on this theme. Prof. Dr. Thiago Regis Longo Cesar Paixão

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry & Polymers and Plastics)
