

Special Issue

Progress in 3D Printing of Polymeric Materials

Message from the Guest Editor

Additive Manufacturing is a rapid fabrication technology utilizing layer-by-layer material deposition that presents numerous advantages over the traditional manufacturing processes, such as possibility to achieve complex parts in fewer process steps, great flexibility of the working procedure, low material waste, etc.

Currently, the potential of three-dimensional (3D) and recently of four-dimensional (4D) printing technology in the fabrication of advanced polymeric compounds is increasing. The Special Issue will cover the complex theme of the current and prospective advances related to the 3D/4D printing.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
