Special Issue

Smart Composites and Processing

Message from the Guest Editor

Smart polymer composites (materials) have been at the forefront of research for the past decades as a result of their unique properties they provide for utilization in numerous applications. In order to manufacture a smart polymer material, choice of ingredients including polymer, filler and additives as well as their unique composition are the key factors. Also smart processing of polymer composite improves accomplishment of the polymer composites, which influenced by choice of mixers, processing condition, processing technique (CO2 foaming), 3D printer, etc. Both ones contribute accomplishment of advanced polymer composites for high-performance automotive and aerospace parts, advanced electronic devices, environment friendly goods, sensors, and others.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
