

# Special Issue

## Protein-Based Biopolymer

### Message from the Guest Editors

Proteins are polymers that are composed of amino acid monomers with amide bonds. The structural and biological properties of proteins are influenced by amino acid sequences. Due to increasingly prominent environmental issues, people are more and more interested in protein and other natural degradable polymer materials and sustainable polymer materials. At the same time, protein has good biocompatibility in the application of biopolymer materials. Therefore, our primary research focuses on protein engineering, protein folding, drug design, and protein dynamics. This Special Issue aims to discuss recent advances in protein biopolymers and their applications. We welcome both research and review articles.

### Guest Editors

Dr. Faez Iqbal Khan

Department of Biological Sciences, Xi'an Jiaotong-Liverpool University, Suzhou, China

Dr. Xuan Xue

Department of Chemistry, Xi'an Jiaotong-Liverpool University, Suzhou, China

### Deadline for manuscript submissions

closed (31 May 2024)

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
