

## Special Issue

# Polymer-Containing Nanomaterials: Synthesis, Properties, Applications

### Message from the Guest Editor

For this Special Issue, research in the field of catalysis and green technologies associated with the use of polymer-containing nanoparticles, as well as catalysis by nanoscale systems of the processes of the synthesis and destruction of macromolecules, will be of considerable interest. Special attention will be paid to manuscripts devoted to aspects of the stabilization of nanoparticles by polymers. The subject of this Special Issue is the results of any fundamental and applied research related to the consideration of the properties of polymer-containing nanoparticles and their use in various industries.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of  
Potsdam, 14476 Potsdam-Golm, Germany

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
