

Special Issue

Application of Polymer Materials in Pavement Design: 2nd Edition

Message from the Guest Editors

With the continuous development of the social economy, the construction of the transportation field has also ushered in new developments and challenges. SBS, SBR, PE, EP, PU, anti-rutting agents, and other polymer materials can be used to modify asphalt and improve its performance, with the application of polymer admixtures in cement and concrete being capable of improving the hydration properties of cement and the strength and durability of concrete. Polymer materials are also widely used in pavement maintenance and disease treatment and are able to quickly restore road function and prolong the road's service life. In addition, the application of functional polymer materials in the field of road performance will not only meet the durability and stability of pavements, but will also realize their green environmental protection and intelligent functions, a topic falling within the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für
Polymermaterialien und Polymertechnologie, Universität Potsdam,
Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
