

Special Issue

Advances in Screw Processing of Polymeric Materials - In Memory of Professor James Lindsay White

Message from the Guest Editors

Screw processing is fundamental for the polymer processing industry and includes many techniques of extrusion and injection molding, e.g., single screw extrusion and twin screw extrusion, both co-rotating and counter-rotating, injection molding and specialized injection techniques, as well as extrusion blow molding and injection blow molding. These techniques provide the conversion from a bulk polymeric material to a product of diverse specifications, and involve the interactions of a process thermomechanical field, material characteristics, and product properties. This Special Issue is dedicated to advances in screw processing, and a novelty is crucial for this issue. Invited and submitted articles may be devoted to material compounding and product manufacturing, novel designs and technology concepts, material aspects of processing, modeling and simulation, both for the process and molding tools (e.g., extrusion dies and injection molds), optimization and scale-up, artificial intelligence applications. The goal of the issue is to present the latest achievements and the trends for future development in screw processing.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
