

Special Issue

Conjugated Oligomers and Polymer Nanomaterials

Message from the Guest Editor

Since the first discovery and development of conductive polymers in the 20th century, conjugated oligomers and polymers with electronically delocalized backbones have been widely used not only for optoelectronic and photovoltaic devices, but also for a variety of recent applications that includes biomedical, energetic and catalytic materials and devices. This Special Issue is highly motivated by the enlarged scope of utilization of conjugated oligomers and polymers, and will pay significant attention to new synthetic technologies, supramolecular assemblies from the nano- to micrometer-scale, new routes for functionalization and modification, structure–property relationships, and biomedical and energy applications. Considering your prominent contributions to this field, I would like to cordially invite you to submit an article to this Special Issue. This Special Issue will publish full research papers, communications, and review articles. I would like to bring together a collection of comprehensive reviews from leading experts and up-to-date research from notable groups in the community.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
