## Natural Polymer-Based Drug Delivery Complexes against Microorganisms

## Message from the Guest Editor

Nano-drug delivery has been established and developed as an alternative technique to improve the effectiveness of antifungals and antibiotics against biofilms. The effective penetration capabilities of nanocarriers (NCs) inside the biofilm can help improve the drug potency for treating several diseases, including biofilm-associated bacterial, and fungal infections. Natural biological molecules are currently being discovered for their antibiofilm potencies to develop effective drug molecules for the treatment of biofilm-associated human infection.

## **About the Journal**

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

#### Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

#### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

### **Journal Rank:**

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
