

## Special Issue

# Fabrication and Application of Biopolymer-Based Advanced Functional Materials

### Message from the Guest Editors

Biopolymers have been employed for the fabrication of functional materials due to their excellent biodegradability, biocompatibility, and modification feasibility. Recently, there has been growing interest in fabrication methods, such as green and facile chemistry methods to modify the biopolymers; self-assembly or spray drying to make microbeads; additive manufacturing to endow controllable 3D structures; foaming to produce pores; hydrothermal/solvothermal reactions to fabricate carbon nanomaterials, etc. Both original research and review articles that focus on the advanced functional materials or biopolymers are welcomed.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
