

Special Issue

Intranasal Delivery of Novel Polymeric Pharmaceutical Formulations and Implants

Message from the Guest Editors

Nose to brain delivery has gained significant scientific interest recently, bypassing disadvantages. Furthermore, reduced frequency of dose and higher patient compliance renders the nasal route ideal for drug delivery. Classic biocompatible and biodegradable polymers, such as PLGA and chitosan, have already been studied for their ability to deliver drugs through the nose. This Issue wishes to host novel synthesized polymers, and modified or grafted already-known polymers, ideal for drug administration through the nose. All formulations concerning micro/nanoparticles, aerosols, as well as implants are expected to be part of this Special Issue. Reviews are also acceptable for publication.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
