## **Special Issue**

# Biopolymers: From Preparation to Application

## Message from the Guest Editor

Biopolymers are polymers produced by living organisms, and their derivatives are diverse, abundant and important for life. With the progress of modern material science, many products based on biopolymers have been developed, including films, fibers, nanoparticles, composite materials (involving fibers, solid particles, etc.), hydrogels, polymeric complexes, nanoporous scaffolds, etc. This Special Issue is motivated by the observed growing interest in the design, fabrication and application of these biopolymers.

Research articles, review articles, perspectives, as well as communications and letters are also invited.

## **About the Journal**

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Editor-in-Chief

## Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

## **Journal Rank:**

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry )
