

## Special Issue

# Luminescent Polymers from Theory to Application

### Message from the Guest Editor

This Special Issue is devoted to a very interesting class of polymers, luminescent polymers. Polymers can be intrinsically luminescent or become luminescent by dye-labeling at specific chain points. In this issue, we call for manuscripts dealing with both intrinsically luminescent polymers (for use in photovoltaic devices) and dye-labeled polymers (to characterize chain dynamics and polymer-polymer interactions, based on luminescence quenching, Förster resonance energy transfer or excimer formation). Applications of luminescent polymers in sensing and imaging, with an emphasis in biological media, are also welcome.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.
