

Special Issue

Advanced Polymeric Materials for Membrane Technology II

Message from the Guest Editors

Further to the success of the Special Issue of *Polymers* "Advanced Polymeric Materials for Membrane Technology", we are delighted to reopen the Special Issue, now entitled "Advanced Polymeric Materials for Membrane Technology II". Membrane processes have gained an important place in the world due to their effectiveness, sustainability, and low environmental impact. Polymer membranes with tailored properties obtained by bulk or surface modification by different approaches or prepared from newly designed polymers are of significant fundamental and industrial interest in various fields. Novel preparation and modification techniques for polymer membranes help to develop emission-free "green" membrane processes that are particularly necessary for modern society. Special emphasis will be placed the following, but other subjects are also of interest:

- Membrane development;
- Membrane characterization;
- Bulk membrane modification;
- Surface membrane modification (plasma, layer-by-layer, thin layers);
- Membrane transport properties;
- Simulation of membrane processes;
- Application of novel membrane materials.

Guest Editors

Dr. Anastasia V. Penkova

Dr. Mariia E. Dmitrenko

Dr. Tatiana Plisko

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
