Special Issue

Multifunctional Polymer (Nano)Composites: Structure-Property Relationships

Message from the Guest Editors

In the past decade, tailoring properties of polymers and plastics through incorporating fibers and nanofillers has attracted a lot of attention in academia and industry. The aim of this Special Issue is to highlight recent progress on design, processing, testing, and modeling of multifunctional polymer composites and nanocomposites with a focus on structure-property relationships. The researchers in the area of polymer composites are invited to submit their original research and review papers to this Special Edition.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
