

Special Issue

Physical Properties of Biopolymers

Message from the Guest Editors

Biopolymers are natural polymers that are considered eco-friendly and sustainable. A better understanding of the physical properties of biopolymers will allow for optimum design of equipment and processes to ensure better applications, so knowledge of biopolymers' physical properties is essential for their applications. The goal of the presented Special Issue, entitled "*Physical Properties of Biopolymers*" in *Polymers* is to share the most significant research on the novel physical characterization of biopolymers as well as perspectives on future trends and challenges in this field. Therefore, we invite everyone to submit their research articles, review articles, and short communications to this Special Issue. However, submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere. All manuscripts are thoroughly refereed through a peer-review process handled by the Editorial Office in a fair and fast fashion

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
