Special Issue

Advances and Innovations in Polymer Composite Nanofibers

Message from the Guest Editors

Nanofibers have emerged as important fibrous materials due to their remarkable properties, which include a high aspect ratio and large specific surface area, mainly because of their micro-/nanodiameters. Moreover, non-woven fiber mats are highly porous and flexible. Nanofibers have shown potential for several applications, but each application has its own requirements related to the material's composition and desired properties. Therefore, studies need to be carried out to optimize the manufacturing process and customize properties. Nanofibers fabricated from polymer composites can significantly improve the properties of nanofibers or provide them with new functionalities and features. However, some challenges may be present in the nanofiber manufacturing process, especially related to the dispersion of nanoparticles in the polymeric matrix and changes in rheological properties. In this context, this Special Issue aims to publish articles related to the fabrication, structure, properties, and applications of polymer composite nanofibers.

Guest Editors

Prof. Dr. Claudia Merlini

Materials Engineering Special Coordinating, Federal University of Santa Catarina, Blumenau, SC, Brazil

Dr. Sébastien Livi

Ingénierie des Matériaux Polymères, Université de Lyon, CNRS, UMR 5223, INSA Lyon, F-69621 Villeurbanne, France

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker
Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
