

Special Issue

Polymeric Membranes

Message from the Guest Editor

Polymeric membranes exhibit the functions of selective material transportation/permeation. Their structures can be both dense and porous, thin-film composites and self-standing, single component and mixed-matrixes. In addition to their functions, the properties of membrane are also of concern in practical processes and long-term operations. Studies on the structural design, membrane preparation, modulus assembly, and process design, as well as integration of topics are of high interest. Polymeric membranes are an attractive and potential topic for researchers in the fields of polymer chemistry, physics, engineering, and applications. This Special Issue aims to collect research on polymeric membranes on various topics and scopes, to demonstrate the recent progress in polymeric membranes, and to provide a communication platform for the researchers in the related fields.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
