

Special Issue

Polymeric Composites for Biomedical Applications

Message from the Guest Editor

Polymeric composites are recognized as one of the commonly used material classes in the field of biomaterials owing to the ability to easily fine-tune and enhance their specific properties to fulfil the desired performance required for biomedical applications. Thanks to the easy process of fabricating polymeric materials, people are able to generate many novel types of composite materials for use in the rising field of biomedical application. Of course, the evaluation of their biocompatibility and safety is still the main focus of many researchers, in addition to their preparation.

This Special Issue aims to report on some of current developments in the design, synthesis and application of polymeric composite materials, including cancer treatment, as well as advances in bone or tooth graft materials, targeting drug delivery and/or demonstrating valuable findings in their most relevant applications.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
