

Special Issue

Polymer-Based Materials for Tissue Engineering and Regenerative Medicine

Message from the Guest Editors

Polymers, including natural, synthetic, and biocomposites, are of paramount interest in tissue engineering and regenerative medicine. Polymer-based biomaterials have been extensively studied due to their availability, biocompatible and biodegradable properties, processability, and low toxicity. The continuous search for improved solutions is crucial for the progress of new and more efficient approaches in tissue engineering and regenerative medicine for the different biomedical applications (bone, cartilage, tendons, ligaments, skin, vascular tissues, and neural tissues). To contribute to this goal, the aim of this Special Issue is to collect and disseminate high-quality scientific contributions in this interdisciplinary field. We invite scientists from different fields to contribute with recent original research or comprehensive review articles. The following topics within, but not limited to, the scope of this Special Issue are:

3D polymeric-based implant;

Design of polymeric-based implant;

Design of biomimetic polymeric-based implant;

Synthesis and functionalization of polymeric implants;

Processing and performance of polymeric implants;

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
